Human Genetics

Human Genetics was founded in 1964 and published up to Vol. 30 as Humangenetik — Human Genetics — Génétique humaine

---

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page per copy, plus a basic fee of US $ 2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-6717, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Walther M → Glenn GM
Wanders RJA → Van Maldergem L
Wang T-R → Chuang L-M
Warner CA → Astrin KH
Weber JL → Petersen MB
Wehnert A → Van Camp G
Wehnert A → Van Hul W
Weier H-UG → Kakati S
Weier H-UG, Kleine H-D, Gray JW: Labeling of the centromeric region on human chromosome 8 by in situ hybridization (O) 489
Weiss G → Glenn GM
Wenger DA → Zhang X-L
Wenger RH, Hameister H, Clemetson KJ: Human platelet basic protein/connective tissue activating peptide-III maps in a gene cluster on chromosome 4q12–q13 along with other genes of the β-thromboglobulin superfamily (SC) 367
Wesby-van Swaay E → De Rijk-van Andel JF
Westerveld A → Hulsebos TJM
Wiandt S → Kaufmann D
Wieringa B → Brook JD
Wilder S → Eyal N
Wilkie PJ, Schut LJ, Rich SS: Spinocerebellar ataxia: multipoint linkage analysis of genes associated with the disease locus (O) 405
Willing MC → Pruchno CJ
Wilson M → Hills L
Wilson PJ → Wraith JE
Winter V → Kølvraa S
Wöhrle D, Steinbach P: Fragile X expression and X inactivation. II. The fragile site at Xq27.3 has a basic function in the pathogenesis of fragile X-linked mental retardation (O) 421
Wohlert M → Nielsen J
Wolf CR → Brook JD
Wolfes H → Dörk T
Wolff G → Mayerovà A
Wraith JE, Cooper A, Thornley M, Wilson PJ, Nelson PV, Morris CP, Hopwood JJ: The clinical phenotype of two patients with a complete deletion of the iduronate-2-sulphatase gene (mucopolysaccharidosis II – Hunter syndrome) (O) 205
Wulbrand U → Dörk T
Wulf B → Dörk T

Xiao H → Kakati S
Xie Y → Bottani A

Yamamoto K → Tsuji H
Yokoi T → Hata A
Yoo H-W → Astrin KH

Zacchello F → Clementi M
Zang KD → Henn W
Zbar B → Glenn GM
Zhang M → Chen S-H
Zhang X → Pruchno CJ
Zhang X-L, Rafi MA, De Gala G, Wenger DA: The mechanism for a 33-nucleotide insertion in mRNA causing sphingolipid activator protein (SAP-1)-deficient metachromatic leukodystrophy (O) 211
Zieger B → Mayerovà A
Zohoun I → Trabuchet G
Zoll B → Millar DS
